HOW IT WORKS

Finding resources has never been easier. United Way's 211 Community Information Center now includes a 211 Reentry Specialist with a direct line to assist in meeting increasing demands for reentry resource information.

Providing appropriate information and referrals is essential for successful reintegration. Finding the right program in the right location with the right hours and eligibility requirements or building your own list of resources can consume a lot of time.

Now you can get direct and immediate access to information and referrals critical to the reentry population from a specialist who understands the barriers and solutions for those previously incarcerated, on suspended sentences, or under legal supervision.

This service is free, a program of United Way in partnership with San Bernadino County Department of Public Health.
