Note: The District makes no guarantee as to the actual quantity or quality of available material and reserves the right to select the permittee(s) that best meet the needs of the District's operation schedule. All submitted Soil Removal applications must include a requested quantity, a proposed start date, and an expected rate of removal. Any requests for removals in excess of 10,000 cubic yards must go through the District's Soil Removal Proposal process. Haul route approval/permit may also be required from the affected city(s).

For questions on a specific location or an appointment to review the site, please contact our office at (909) 387-7995.

* Any facility with an asterisk denotes that no screening/processing will be allowed at this location.
