

The Earth Machine

Specifications & Features

Norseman Plastics Environmental Products Division has led the market in backyard composting initiatives in North America and the United Kingdom for the past 15 years. The Earth Machine™ is the most successful product of its type in the world. Since its introduction, more than 2,500,000 Earth Machines are in use in over 3,500 communities.

The Earth Machine™ has several features that make it superior to other compost bins on the market:

SIMPLICITY OF USE

For the active composting person

Easy Access through the large lid opening, easy turning and aerating, no corners for material to get stuck in, design allows for easy batching and good quality compost.

360 DEGREE ACCESS TO THE PILE

Because of its round and conical shape, The Earth Machine can be turned to access the pile from any direction.

TWIST LOCKING LID

The Earth Machine lid is easy to use, functional, durable and secure. The lid is the most utilized part of any compost bin.

SIMPLICITY OF USE

For the passive composting person ("*Dump & Run*")

The Earth Machine™ is designed for easy, passive composting – just start filling the bin, water, and occasionally stir or poke. The finished compost is ready in two to three months.

VENTILATION

The Earth Machine combines both horizontal and vertical columnar convection ventilation that is controlled through the lid.

AESTHETIC APPEARANCE

The Earth Machine, with its gently conical shape, is designed to allow adequate ventilation throughout the unit, to promote aerobic decomposition of organic materials, plus controllable ventilation built into the exclusive lid.

RODENT RESISTANCE

The Earth Machine secures to the ground with sturdy "Twist Pegs" with securable access door, twist locking lid, air vents too small to allow rodent entry, and securable harvest door all add to the rodent resistancy of the bin.

RECYCLED CONTENT

High-density injection-molded polyethylene made with a minimum 50% post-consumer recycled materials.

EASE OF TRANSPORTATION

The Earth Machine will fit into any automobile for easy transportation. It comes in two halves (no corrugated cardboard packaging) which nest inside each other.

EDUCATIONAL MATERIAL

Every Earth Machine compost bin is packaged with assembly/replacement instructions and a comprehensive 20 page "Home Composting Handbook".

EASE OF ASSEMBLY

Basic two piece assembly that snaps together in seconds without the use of any tools. The unit will not sit around in garages, sheds, etc. because of assembly complications.

DURABILITY

The Earth Machine is made of tough high-density polyethylene with UV stabilizers for all season strength and weatherability.

WARRANTY

The Earth Machine has a ten year warranty against cracking, deterioration, warping, or any other defect that would diminish the effectiveness or appearance of the compost bin.

ADDITIONAL INFORMATION

Unit dimensions when assembled: 33" diameter by 33" high.

Weight: 15 lbs

Volume: 10.5 cubic feet (80 Imperial gallons or 300 litres)

What's Included?

Upper and lower compost bin halves, lid, door, and four twist pegs, "Home Composting Handbook", assembly instructions and 10 year warranty.
